

2nd European Agroforestry Conference
04–06 June 2014, Cottbus, Germany

Integrating Science & Policy to Promote Agroforestry in Practice

organized by

EURAF - European Agroforestry Federation

hosted by

**Brandenburg University of Technology
Cottbus – Senftenberg**

Objectives: The conference aims at stimulating the broad adoption of agroforestry practices across Europe. For this purpose the emphasis will be put on recent advances in terms of both science and policy in agroforestry reported from the different regions of Europe. In addition, experience gained by **EURAF** regarding adoption of agroforestry on a European level will be shared. The program consists of a **plenary session, parallel workshops, poster sessions** and plenty of time for discussion between conference participants. Selected authors will be invited to submit an article to a **special issue** of the journal **"Agroforestry systems"**.

Plenary session: EURAF lessons learned and what to expect in the future

Parallel workshops: **1.** Recent developments in agroforestry across Europe; **2.** Innovative solutions for sustainable agriculture with agroforestry; **3.** Environmental benefits provided by agroforestry; **4.** New insights into carbon, water and nutrient cycling in agroforestry; **5.** Agroforestry for land reclamation; **6.** Policy proposals and impacts

Abstract submission starts: 01. January 2014

Abstract submission ends: 28. February 2014

More information about registration will be given within the 2nd Announcement in December
