Come and join FCCT and a host of speakers to find out how to farm profitably and sustainably in a changing climate.

WHAT'S IT ABOUT?

FCCT will bring together farmers, retail leaders, researchers and policy experts. Together we'll focus on effective ways to reduce farm greenhouse gas emissions and improve farm profitability.

Come along to hear from farmers who are successfully improving farm efficiency. Find out about new research and future market opportunities and challenges that will positively effect your farm business and its profitability.

Check out the website for the full programme of the day and more information on our speakers –
