

Programme

- 10.30** Aims of the day and welcome to the farm
- 10.45** Farm tour with stops:
- Why agroforestry, the system and lessons learned (Iain Tolhurst)
 - Tree planting and support available (Luke Everitt, WT)
 - Summary of agroforestry research findings (Jo Smith)
 - Estimating establishment and ongoing costs (Sally Westaway)
 - Woodchip compost (Iain Tolhurst)
- 13.00** Home made organic lunch
- 13.45** Agroforestry design (Niels Corfield)
- 14.30** The new UK agroforestry network (Sally Westaway)
- 15.15** Q&A and close

AGROFORESTRY INNOVATION NETWORKS

Supporting innovation through enhancing knowledge transfer between farmers, foresters, researchers and advisers.

In the UK, the AFINET project is led by the Organic Research Centre and Abacus Agriculture.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 727872.

UK Agroforestry Network

Working with the Farm Woodland Forum

Bring together practitioners, researchers and innovators who share a common interest in agroforestry.

We will coordinate a web based knowledge hub and organise a series of practical on farm events tailored to the interests and needs of the network. Through these activities the project aims:

- **to identify and fill some of the gaps in current knowledge**
- **to share ideas that work well**
- **to identify opportunities for innovation**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 727872.

UK agroforestry innovations survey

Farmer/ land manager	46 %
Researcher	22 %
Conservation organisation/ charity	10 %
Advisor	9 %
Forester	7 %
Government organisation	6 %
Contractor	1 %

Silvohorticultural systems

- **77 people interested**
- **22 people have experience**
- **20 are currently practicing**

Biggest problems and barriers to setting up an agroforestry system

1.	Economics	31 %
2.	Policy	22 %
3.	Time and expertise	19 %
4.	Advice/ best practice examples	19 %
5.	Access to land/ tenure	17 %

Problems/ barriers

‘Lack of relevant advice/toolkits to suit our farm and land. ‘

‘As an employee it will be up to me to persuade the owner that agroforestry is worth investing in, which could be tricky...’

‘Cost of trees, security of tenancy/longevity’

‘Finding land to rent for long term tree-based systems’

Innovations/ solutions

‘Finding partners who will pay for the trees and have tree growing experience, access to markets and the harvesting/ processing set up.’

‘Intercropping of apples with soft fruit’

‘Planning to plant into existing beetle banks’

‘Experiment on a small scale - learn from mistakes’

What additional information on agroforestry would be useful for you?

1.	Working examples/ case studies, knowledge exchange/ training	34 %
2.	Profitability, yield data. Costs/ benefits.	25 %
3.	System design, species choice	22 %

Useful information

‘One site where you could see lots of different agroforestry systems’

‘Variety recommendations and a beginner's guide to starting agroforestry.’

‘More detailed and costed examples and case studies of systems that work’

‘Exact clear guidance on what is/isn't allowed in regard to BFP/Higher/mid tier schemes, CS capital grants Greening etc.’

Next steps.....

- **Survey responses will guide the website content and workshop programme.**
- **Workshops will provide networking and knowledge sharing opportunities and offer support and training for specific subject areas.**
- **Partnerships within the groups (e.g. with Innovative Farmers) will allow further research/ trials/ knowledge gathering**

We would like to invite you to be part of this UK agroforestry network

If you would like to be added to the mailing list, please pick up a leaflet, add your email address to the list at the back or visit:

<http://eepurl.com/cYnhN1>

What we are asking you today

- As a group to help us decide on the focus of the silvo-horticulture (trees and vegetables) group?
- What would be useful for you?

Focus areas for group

1. Economics
2. System design
3. Policy
4. Ecosystem services
5. Tree management
6. Social factors
7. Other

Trees and horticulture: things/places/people that have been inspirational/interesting

This is why you need trees on farms.....
