

**English nature Project 2004/05
DM3/Staff Development/04/05. Organic Management-Staff
Development Tools**

Funder: English Nature
Collaborators: IOR-Elm Farm Research Centre
Start Date & Duration: 1st April 2004-31st March 2005 (12months)

Overall Aim

Elm Farm Research Centre have over a number of years successfully produced a range of training materials to help conservation staff utilise the potential of organic farming to best effect on both special sites of value for biodiversity and in the wider countryside. This project is intended to further extend the availability of this work.

Position within EFRC Research Programme:

Position within EFRC Research Programme:

Objectives

To provide a one-day seminar for National Nature Reserve (NNR) Managers.

To continue to moderate the ORGNNRS discussion group.

Expected Benefits

Continued involvement with English Nature and influencing the countryside conservation bodies with respect to the benefits of organic farming systems.

Project Output

A report providing details and conclusions from the one-day seminar.
