

10'000 T's

To outline some of the future developments being explored as well as the current 'non-organic' markets and contracts

-
- Naked oats overview
 - Current market opportunities
 - Spring variety option
 - Future development objectives
 - Producer feedback on opportunities

- Spring and Winter varieties available
- Exclusively on secure buy-back contract
- Good break crop
- Low input – high output crop
- High straw value where markets are available
- Spring option to give control of grass weeds
- Spreads harvest

Current markets

Naked Oats

- High yielding spring naked oat
- In comparison to Firth conventional oat:
 - Same standing
 - Similar straw length
 - Earlier maturity
- Moderate mildew resistance
- Only Crown rust to be aware of
- Like other spring crops offers an option for control of grass weeds

Future developments

- Comprehensive trials programme
- Customer integration
- Marketing & profiling
- Increase in acreage to supply markets

Further developments...

Thank you
