

Organic growing where soil is not an option

Margi Lennartsson
Garden Organic
CAWR, Coventry University

ORC Organic Producer Conference

2 February 2017

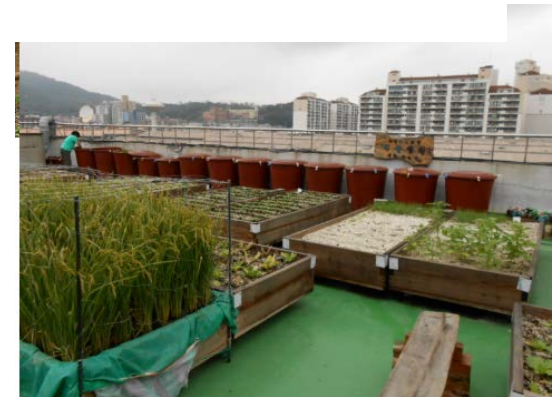

Where soil is not an option

Vertical Veg

The Skip Garden, Global Generation, London

Roof Top Garden, Seoul, South Korea

The Skip Garden, King Cross, London

Organic growing in containers - What should the criteria be?

Container

Size and type

Growing substrate

Organic/responsibly sourced ingredients

Biologically active

Substrate ecosystem

Nutrient feeding regime

Source of nutrients

Availability of nutrients

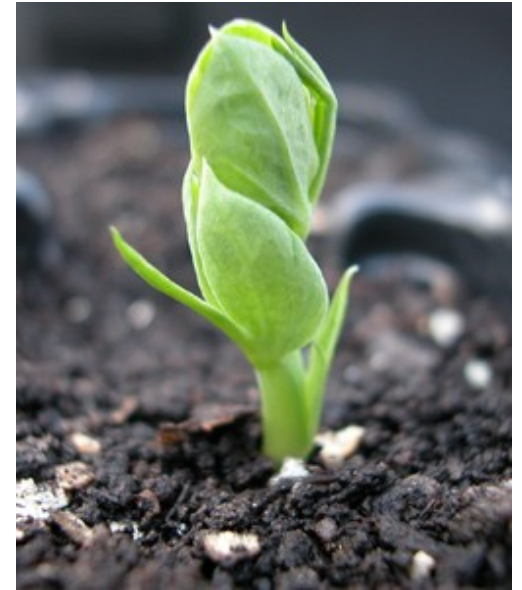

Situation

Direct access/marketing

Where soil is not an option

Labelling

Grown organically in containers

Bio-Aquaponic systems - can they be organic?

Thank you
